# Our Company

Our founder's personal experience standing in a flooding shower inspired her to create a company that takes care of recurring home maintenance hassles, so they don't become bigger problems. Fi Home Services is happy to handle your everyday home maintenance chores so you can rest easy and potentially avoid an emergency. This is critical for homes whether occupied or not, because the sooner we discover an issue the faster, easier, and more affordable the resolve.

**Say Fi** and gain your peace of mind with **Fi Home Maintenance** and **Fi Home Watch**.

"A white glove approach to handling your home's needs"

# Our Services

## Home Maintenance

- Almost 70% of homeowners admit to not maintaining their home as recommended.
- Unchanged filter affects air quality, especially during pollen season, and will take years off the life of your equipment.
- Sediment from water needs to be regularly flushed from water heater tanks and descaled from pertinent appliances to prevent voiding manufacturer warranties.
- Annually, 97% of the nearly 500,000 ladder-related accidents originate at home and falls are the leading cause of injury and death among DIYers.

## Home Watch

- An unoccupied home is a vulnerable home, and not in the way you might expect!
- Plumbing lines need to be cycled to keep traps wet and full so smells and drain flies are trapped outside.
- Power outages can reset integral systems like the thermostat, refrigerator, humidors and wine cellars.
- Humidity needs to be monitored to prevent microbial growth.
- Insurance companies may require Home Watch visits to provide coverage for damage claims.
- Vehicles require regular drives to recharge the battery and keep fluid lines cycled.

## "That's a great idea!"

In 1736, Benjamin Franklin proclaimed, "An ounce of prevention is worth a pound of cure." While he was referring to measures in fire prevention rather than fire fighting, in today's world, this quote takes on just as much meaning. Your home is likely your greatest asset. You've built memories with family and friends. You've relied on your home to store your valuables and keep you safe. And likely, you're busy with family, work, and other life priorities.

At Fi Home Services, we work to protect your peace of mind by helping you prevent costly emergencies by engaging in routine maintenance in a holistic manner. We are your one-stop resource for maintenance, home watch when you're away, concierge services, and more. Members of our Fulfillment team are skilled and trained to take care of your home according to standards recommended by manufactures and experts for optimal performance.

We're ready to provide your home our FI white glove level of care.
